

## **MATALCO INC., A MEMBER OF THE GIAMPAOLO GROUP ANNOUNCES MAJOR US EXPANSION**

**Brampton, ON - August 1, 2013 – Matalco Inc. (“Matalco”)** a member of the Giampaolo Group and a leader in the production of remelt (or secondary) 6000 series extrusion grade aluminum billet, today announced plans to make a significant investment to further expand its operations, facilities and hiring into the United States. This initiative is taking place in order to support the growing demand for Matalco’s high quality industry-leading products and services.

Matalco plans to build a new state-of-the-art Greenfield Remelt Extrusion Billet Facility producing in excess of 300 million pounds of aluminum billet annually. The expansion will include and integrate Triple M Metal LP’s (another member of the Giampaolo Group) new non-ferrous plant to both procure and handle all of Matalco’s aluminum scrap requirements, as well as process other non-ferrous materials (i.e. copper, brass, etc.) independent and separate from Matalco.

To date, Matalco has identified a short list of construction site locations within a few key states. Senior management will make a decision as to the final site selection in the coming weeks.

*“We are extremely excited about entering this next phase of our corporate strategic growth plan. The business expansion plans that we are announcing today will further expand our market share and are in direct response to the growth and demand that we are experiencing with our products and services.” said Armand Sanguigni, President, Matalco Inc.*

### **About Matalco Inc. ([www.matalco.com](http://www.matalco.com))**

Matalco Inc. is a leading producer of 6000 series extrusion grade billet manufactured primarily from scrap aluminum. Matalco Inc. has two plants strategically located in Brampton, Ontario and Canton, Ohio to serve our North American customers, with a combined annual production capacity of 350 million pounds of remelt quality billet. The company provides LEED qualified material and is both ISO 9001 and 14001 certified. Matalco prides itself as being North America’s largest independent remelt facility and an affiliate of Triple M Metal LP, Canada’s largest processor of recycled metal and top 10 in North America in terms of volume processed and shipped. This strategic relationship ensures that Matalco is provided with a stable and ready supply of scrap.

### **About The Giampaolo Group**

The Giampaolo Group is a fully integrated metal management company featuring **Triple M Metal LP**, one of North America’s largest ferrous and non-ferrous metals recycling and processing operations; **Venture Steel Inc.**, a steel processor and distributor of metal with a distinct focus on flat rolled steel products; **Matalco Inc.**, a leading producer of 6000 series extrusion grade aluminum billet manufactured primarily from scrap aluminum and **Global Electric Electronic Processing (Geep)**, a global leader in electronic asset management, data erasure for secure reuse and safe, compliant end of life electronics recycling for maximum resource recovery and diversion from landfill.
